The National Center for History in the Schools (NCHS), UCLA is pleased to announce publication of *World History for Us All: The Big Eras: A Compact History of Humankind for Teachers and Students*. In 96 concise pages, this book tracks the human adventure from the time of our earliest bipedal ancestors to today. This innovative contribution to the study of world history on a very large scale was authored by Edmund Burke III, Prof. of History at UC Santa Cruz; David Christian, Prof. of History at Macquarie University, Sydney, Australia; and Ross E. Dunn, Professor Emeritus of History at San Diego State University.

World History: The Big Eras brings together in a seamless world-scale narrative historical essays that appear in *World History for Us All*, the model curriculum for world history available on line at <http://worldhistoryforusall.sdsu.edu>. Published in magazine format, this slim volume will be a valuable companion to all educators who use the electronic resources of *World History for Us All*. It also stands alone as a brief history of humankind, inviting teachers, students, and all global educators to explore the past on big scales.

The book starts with the premise that study of the past on the global scale reveals patterns and raises questions that may be invisible at the lower scales of civilization, nation-state, and ethnic region. Middle and high school teachers wrestling with state content standards will find this concise narrative useful in developing coherent curriculum and for helping students connect specific topics to wider landscapes of historical meaning. The book's panoramic approach is also highly compatible with the Advanced Placement World History course.
